## PROFESSIONAL SKILLS

- SQL
- Excel
- Power Pivot
- Python
- Git/GitHub
- Kanban Boards
- Power BI
- Tableau

## ABOUT ME

I am motivated, teamwork-oriented, and reliable. I love puzzles, strategic games, and tinkering. Taking hardware apart and fitting pieces back together, from memory or trouble shooting, has always been thrilling to me. I am passionate about helping others, so data analytics is a new source to further my course of helping people. Since I always find myself organizing my everyday life, data analytics is something I have grown to truly love and really look forward to diving in deeper.

## ACADEMIC BACKGROUND

### Nashville Software School

Data Analytics Bootcamp | Expected to graduate Jan 2021

The bootcamp consisted of exploratory data analysis, presenting findings with dashboards, applying analytics workflow to problems, and training in spreadsheets, Python, and SQL.

### Nashville Software School

Data Analytics JumpStart | Sept. 2020-Aug. 2020

Focus was on Python for the three week course.

### Volunteer State Community College

Pre-nursing classes | 2012-2018

## DATA ANALYTICS EXPERIENCE

### Data Analytics

Nashville Software School | Aug 2020-Current

I incorporated Excel, SQL, and Python to clean and parse through data, then created and designed visualizations in Power BI and Tableau to easily present my findings.

## DATA PROJECTS

### App Trader Group Project (PostgreSQL and pgAdmin)

- Our team was given data containing two tables without a key to parse through and find trends in. They asked us to make a recommendation for the top 10 mobile apps to invest in, so they could maximize profit from in-app advertising and purchases. We used SQL queries on data from Apple and Android stores, and when we came up with our finding, we created a presentation in Google sheets to visualize our conclusion.

### Company Sales Visual Project(Power BI)

- I created an interactive dashboard, using a companies sales data, which contained dates, prices of sales, countries the sales came from, types of products, salesperson, and their title. I was able to visualize the sales by country over the three years. This allowed me to view their growth, allowing them to determine where to branch out next. The next page Gives an other view of all employees along with a filter to drill down to individual salespeople.

## PREVIOUS JOB EXPERIENCE

### In-Home Healthcare

Private Contactor | March 2018-June 2020

Maintained home care records that include any changes in doctors orders, medications, diet, or personal living activities.

### Anesthesia Technician

TriStar Summit Medical Center | Jan 2013 - Feb 2018

I managed inventory and corresponded with central supply chain to preserve the supplemental amounts of stocks needed. I maintained communication with anesthesiologist and CRNAs throughout the week, to obtain materials needed for special procedures. I enhanced the techs performance to exceed time and quality for our whole department. Took time to talk with techs about keeping specific jobs a priority. Downtime, would be spent stocking and prepping a day before procedures and I improved communications, to make sure all jobs were complete and every call was attended to.
