ABOUT ME

I have been passionate about data and its capabilities since I was a child. I spent countless nights organizing my baseball cards according to statistics. This curiosity has developed into a love of analyzing and organizing data into useful visualizations. I enjoy working in groups and collaborating on projects.

DATA ANALYST EXPERIENCE

Data Analytics | Nashville Software School Student | Sept. 2020-Present
Currently enrolled in a 15-week intensive data analytics boot camp. Learning how to work remotely through group and individual projects. Using real world data sets that are unorganized and difficult to clean, transforming them into orderly presentations and accurate representations of each data set. I have comfortably learned to use and operate many data programs in a professional manner.

PROJECTS

Lahman Baseball Database Project:
Used a dataset of 27 tables with baseball statistics. Utilized an ERD and PostgreSQL queries to answer questions. This project required the use of joins, common table expressions, window functions, and case statements.

Un Data Sets Project:
Examined gross domestic product and internet usage of every country in the world by using Python in Jupyter Notebook. Created, filtered and merged data frames to determine correlations between GDP and internet usage.

PROFESSIONAL EXPERIENCE

Deli Clerk | Publix Supermarket | 2017-Present
Thriving in the busiest deli in Tennessee. Provides premier customer service while problem solving and making efficient decisions on demand. Maintains a positive attitude despite difficult work circumstances. Frequently acts as a confidant and adviser to other co-workers.

Creative Account Manager | EdgeTheory | 2012-2015
One of the first four employees for this startup social media company. Created and executed unique content for global clients, managing 15-20 clients at a time. Collaborated with clients on a weekly basis, including but not limited to onboarding clients, creating brand specific messages tailored to each client's focus group and crafting SEO content through keyword analytics.

EDUCATION

Nashville Software School | Data Analytics | Graduating Jan. 2021

Mississippi State University | Biological Sciences (BS) | Graduated 2010
