Aspiring Data Analyst with a demonstrated history working in the automotive, financial, and information field. Experienced in Python, Javascript, SQL, Tableau, PowerBI and Excel. A strong Professional thats looking to evolve my current skill set to meet the demands of whatever challenge I face. An astute leader who's always striving to put both myself and my team in a better position by understanding the bigger picture.

Experience

Nashville Software School   Sep. 2020 - Expected Graduation Feb. 2021

Completed an intensive 5 month Data Analytics program

* *Leveraged excel to analyze low income areas with the elderly and project the best way to assist areas*
* *Analyzed growing trends in the electric vehicle market and created a completely interactive dashboard in Tableau to highlight those trends*
* *Used SQL to merge and analyze in store purchases between Google and Apple app store and identify growing trends in them.*

Owner at Redline Auto Oct. 2014 - Feb. 2020

* *Built business from the ground up to do over 1 million in sales a year*
* *Hired and developed a team to handle all day to day business*
* *Developed and successfully implemented a business strategy to focus on a niche market by centering my business on a handful of sports cars. I optimized the effect of my team in marketing, maintences and sales by focusing only on these cars*
* *Streamlined a marketing plan to target customers using multiple online platforms*

Financial Advisor at North Western Mutual   April 2013. - Aug. 2014

* *Gained Experience from the top Financial Advisor in the greater Nashville area*
* *Analyzed my clients financials to optimize their financial portfolio using risk/output calculations*
* *Developed and maintained relationship with my clientele*
* *Exceeded sales goals by at least 23% quarter over quarter*
